

2019 Annual **Sustainability Report**

Suppliers Management

GRI 102-9, 308-1, 414-1

In 2019, OdontoPrev's supply chain was composed of 597 entities and most contractors represented transportation, telecom, marketing, and systems development services. All supplier agreements are executed based on social and environmental criteria, good labor practices, and human rights.

An online system contacts the suppliers' chain, thus, allowing a quick exchange of information, concentration of documents into a single platform, and data traceability. The Company's Suppliers Management Policy aims at defining managerial rules and parameters and relationships with the supply chain, based on respect, transparency, integrity, and trust. Suppliers are evaluated quarterly by OdontoPrev SRM Program, through which contract managers assess the efficiency, effectiveness, innovation, and conformity with compliance rules.
